GVF Types

Simple Types

- Number: A literal number. The game engine can usually take either a float or an int.
- Int64: Ending the number with an i64 means it's an int and is usually used for score values.
- String: A literal string encased in double quotation marks (").

Localized String

T("string")

Often used in UI elements.

Tuple

[1, 2, 3<,4>]

So far only used for numbers. Commonly used in UI and OFX.
